

**The Present Approach Adopted by CSK
for the Prevention of the Spread of Influenza in School**

The school closely monitors the case under the supervision of the Crisis Management Committee. Several meetings have been conducted to discuss the matter.

The number of students who asked for sick-leave because of contracting flu is slightly higher than those of the same period of the previous years. There is no serious outbreak of the infectious disease in a single class.

The school has informed students, staff and parents of the importance of being alert or the need to step up measures for preventing the outbreak of the disease in the school through various channels.

After thorough consideration and until this moment today, the school has found that there is no urgency in the adoption of the closure measures. However, the school will closely follow the instructions given by EDB for dealing with the case.
